

五十週年

撰文/輔英科技大學 張惠人執行董事

不由自主的走入了東港老街延平路，雖然到達海邊並不一定要經過這裡，眼前古老的巷弄依舊，時間卻已經跳過五十年。坐在走廊前的白髮老婦，仔細一看竟是當年的鄰居大嫂。真快！社會的變遷，難不成我們早已經變了一個模樣。

五十年前輔英科大的前身「婦嬰」最早誕生於東港漁村小鎮，是舊社會中的小診所與台灣第一間私立的助產學校，在當時應該也是小鄉鎮內的現代化企業，開啓了創辦人董事長張鵬圖先生的夢想。只希望有朝一日，「婦嬰」會成為全台最有名的護理學校來回饋社會。

六〇年代，「婦嬰」助產學校順利改制為專科，爾後隨著專業科目的擴大而取其諧音更名為「輔英護理專科學校」。近十多年來在校長張一蕃領導下，專科歷經技術學院改制，現在已經成為以健康醫護為主的科技大學，矗立於南台灣。

當我們緬懷著過去，歡慶本校五十週年慶的同時，面對當前環境的巨大衝擊與變動，早已不容我們乘著前人的餘蔭而不思進步。傳統的教育內容與方法，雖然暫時能夠應對眼前社會的需求，但面對現代台灣社會全球化的狂潮及科技突破的時代，如何尋求我們的新價值，提昇輔英的競爭力，甚至躍居同領域創新引領的重要地位，已是我們無法推卸的責任。

未來的輔英，大家必須運用多元的想像力來描繪，因為產業全球化的觀念，教育的本質，必然是走向國際化的腳步，在此所謂的國際化，不僅是語言的熟練而已，更應該涵蓋的是思維、視野的國際化提升，創新知識的全球化交流，因此，未來的輔英，應是一個無國界限制、實質國際化的現代科技大學。

由於廿十一世紀科學的革命，健康醫學、環境生物技術及人文價值的巨大突破，已為未來的產業闡明了必走的方向，將未來產業融入輔英教育體系已是必需努力的重點。因此，未來的輔英校園，必定涵蓋創新產業的影子，不但在實質的研發之中，亦同時呈現於教材之內。

在上述概念為基礎下，未來的輔英，更需開創領先的特色科技，正如2008亞太生技大展，本校提出的主題「引領生技產業新趨勢，開創醫療診斷大紀元」。由所有接觸過的產、學、創...等專家的熱烈回響，我們確信自己在這條大道上已經邁開了一大步。

輔英未來夢想的實現，是需要努力與付出的。經驗告訴我，身為每一階層的主管，必須要清楚的告訴所有同仁目標與牛肉在哪裡，讓所有同仁瞭解改變的機會已經到來，清楚體認到「我們必須改變」的重要性，而具體的執行方式，便是人人親自站在第一線作為所有工作同仁一起奮鬥的伙伴。

五十年校慶於感恩之餘，亦期盼未來無限榮耀環繞輔英校園。

50th Anniversary - Foreword

Hui-Jen Chang, Executive Director of Fooyin University

I recently found myself walking along Donggang's Yanping Road. It wasn't necessary to take this historic street to reach the seashore, but while fifty years have passed by, the old lanes and alleys seem to have been left completely untouched. Upon closer inspection, a white-haired old lady sitting out the front of the arcade turned out to be the aunt next-door from all those years ago. How swiftly time flies! Has so much changed in society and in us already?

Fooyin University first opened its doors 50 years ago here in Donggang, a small fishing town. It was a small clinic in a traditional town and the first private midwifery school in Taiwan. At the time, it was probably the first modern enterprise to appear in the area. For founder and chairman Peng-Tu Chang, it represented his dream of giving back to society by making "Fooyin" the top nursing school in Taiwan.

In the 1960's, the "Fooyin" midwifery school became a vocational school. As the curriculum expanded, the name was changed to the "Fooyin Junior College of Medicine and Nursing". The Chinese characters were also changed from meaning "Women and Children" to "Supporting the Best". In the past decade, under the leadership of university President Yi-Fan Chang the junior college was restructured in accordance with reforms to the vocational school system and is now southern Taiwan's university of technology specializing in health and medicine.

As we remember the past and celebrate the 50th anniversary of the Fooyin University, there are now massive changes underway that force us to look towards the future instead of resting on our past achievements. Though conventional curriculums and teaching methods are adequate for society's existing expectations, the upheavals in Taiwanese society brought by globalization and breakthroughs in technology means we must now find new values. The responsibility of boosting Fooyin's competitiveness or even becoming the leader in our chosen field now falls squarely on our shoulders.

It is now up to everyone to use their imagination to envision what Fooyin should become in the future. With the globalization of industry, education will become international in its nature as well. This internationalization is more than just language fluency but also in thinking, perspective and the sharing of innovations with the rest of the world. Fooyin in the future should therefore become a modern university of technology that embraces internationalism and is no longer limited by national frontiers.

Due to revolutionary developments in the science of the 21st century, major breakthroughs have been made in health, medicine, environment, biotechnology and the humanities. These provide a beacon for future industrial development and in the future, Fooyin must work towards incorporating future industries into the Fooyin education system. This is why any future Fooyin campus will undoubtedly play host to innovative industries not only through practical research but also in the teaching materials as well.

With the above ideal as a guide, in the Fooyin must become a technology leader in specialty fields. This was also the theme chosen by Fooyin for the "Bio Taiwan 2008" exhibition – "Lead innovations in the bio-tech industry, usher in a new era in medical diagnostics". This was well received by all the experts from the industry, academia, innovation industries and other areas so we can be sure that we have taken a great step forward along this path.

Realizing Fooyin's dream for the future will require effort and sacrifice. Experience tells us that supervisors at all levels must show all employees exactly what the targets and benefits are. This will let every employee understand that the opportunity for change has arrived and truly embrace the importance of the "need for change". Having concrete methods for making the changes happens will allow everyone on the front line to work side by side.

For the 50th anniversary of the Fooyin University, in addition to the feelings of gratitude, I also look forward to seeing a Fooyin campus filled with endless accolades in the future.
